ABOUT US

iTalent Academy

The brainchild of Talent Discoveri, is one of the company's latest initiatives. This institution aims to develop well rounded and skilled individuals, who will be trained to excel in their chosen fields. iTalent offers a series of interactive and engaging workshops that provide tailor made solutions through training and development for all sectors.

iTalent started as an initiative to add value to the Human Resource Industry. This is done by tracing back to the roots and honing an individuals skill set to help them perform to the best of their abilities. It also caters to organizational effectiveness and team building activities within corporations. The most valuable addition is to the Education sector – where trained industry professionals conduct seminars for aspiring students who are on the brink of entering the corporate world.

MENTORING PROCESS

The Mentoring process is carefully constructed to address three vital elements:

EDUCATE

Education is elevating information to knowledge. iTalent is a platform designed to empower people, to rise to the top, ensuring a smooth transition. For mid level and new executives, this initiative allows for propelled adaptation into the new profile. It also enables students to acclimatize with rapid changes in the fast paced corporate world.

TRAIN

Development is an inevitable process, but optimum development is a product of a carefully curated training program. iTalent training programs ensure long term stability, uninterrupted transitions, and the right attitude for lifelong learning.

DISCOVER

Acquiring the right talent isn't just about checking off the list, it's about finding skilled individuals perfectly suited to fit, adapt and grow in the job.

We come full circle with...

iTalent PRODUCTS

Soft Skills Training

Fulfilling the checklist of all the right technical skills is just not enough in today's competitive environment. One's ability to communicate effectively, coexist in a community and resolve conflicts amicably, marks the difference between an average employee and a potential leader. iTalent offers a unique module in Soft Skills training that will groom individuals to realize their full potential.

The program is available to:

Students at University

Entry Level Employees

The structure of the seminar allows for flexibility and modifications to suit the needs of any specific sector. Our trained experts will help foster strong individuals who will contribute towards building an even stronger community.

LEARNERSHIP MODULE

The parent company of iTalent, was set up by members of the Insurance Industry who believe in giving back to the community, where they gained a lifetime of experience. The Learnership module is an educational initiative, providing functional knowledge of Insurance products and services to aspiring students. Combining the functional knowledge from Learnership, with Soft Skills from the training program, iTalent has set out to mould each block to lay a strong foundation for the Insurance sector to flourish.

INNOVATOR

Developing young talent to grow in their field is the first step to building a successful foundation. However, grooming the mid and senior level management to raise the bar of their predecessors, is equally important to propel the company to the next level. The innovators program is an executive leadership module, offered to members with 10-15 years work experience in their chosen fields. This exclusive leadership program has been designed to "Discover the DNA of Future Leaders" – churning the cream of the crop.

The background of the slide features a warm, golden-yellow color scheme. On the left side, there is a faint, semi-transparent image of an open book with its pages visible, and a silver-colored pen with a clip resting on the left page. The text 'iTalent Academy' and its tagline are positioned on the right side, overlaid on a dark, diagonal band that cuts across the lower half of the image.
